BEAUTY AND HEAT WITHOUT THE HASSLE

You can add the charm and warmth of a fireplace to your home - in about an hour!

The Bostonian E is easy to setup, just plug into any standard 110 volt wall outlet. Choose your face and add one of our Fireplace Cabinets and within a few minutes you will be enjoying the incredibly realistic flames and flickering embers of a fireplace in any room of your home.

YOU CONTROL THE FIRE - One of the most remarkable features of the Bostonian E is the realistic appearance of flames and glowing embers. With your remote control you can change the speed of the flames between a slow, lazy fire to a fast roaring fire.

YOU CONTROL THE ACCENT LIGHT - With your remote you can change the interior accent light from off, where only the flame is giving off light for a very romantic fire or increase the light to show off the 3D interior brick fireback.

ADDED HEAT - Need a little heat to warm up your home on that cold winter morning? Your Bostonian E provides you with gentle, even heat. The Bostonian E comes standard with a 1500 Watt heater and air circulating fan that can provide a great supplemental heat source to a room (350-400 sq. ft.).

OPERATE WITH-OR-WITHOUT HEAT - Just lower your thermostat setting and you can enjoy the flame without the heat. This allows you true year round enjoyment of your fireplace!

SAFE TO USE - The Bostonian E features cool to touch glass and is completely safe for children. The Bostonian E provides a "Healthy Choice" by not contributing to indoor moisture or mold problems like vent-free gas products.

INSTANT FIREPLACE - You can have a fireplace installed in your home in a matter of minutes with an optional Fireplace Cabinet. Ideal for those locations in your home that you'd like a fireplace but cannot be easily vented, such as basements and interior walls. You can move your Bostonian E fireplace to any room or take it with you if you move. This portable feature makes the fireplace perfect for apartments and condos as well.

ECONOMICAL TO OPERATE - On average, the Bostonian E costs just \$.03 per hour to operate with flame only and \$.16 per hour with both flame and heat on when in continuous use.

INSTALL AS A FIREPLACE INSERT

Now add the beauty and convenience of the Bostonian E into an existing fireplace. The NEW 8" Panel Set allows you to convert the Bostonian E into an insert that is designed to fit many masonry or ZC fireplaces.

Covers: 44 3/16" W x 34 1/8" H

PURIFIRE® AIR FILTRATION SYSTEM

Indoor air quality is one of the most important issues facing homeowner's. The Bostonian E addresses this critical issue with the Purifire®* Air Filtration System. Standard on all Bostonian E fireplaces, the Purifire® Air Filtration System is designed to clean the air in an average room 2 times an hour on low and 4 times an hour on high. The washable filter is designed to remove impurities as small as 1 micron - which includes most mold spores, dust, pollen and pet dander.

*Purifire® is a registered Trademark of Dimplex NA

BOSTONIAN™ E ELECTRIC FIREPLACE

STERLING™ WOOD CABINETS

If you are looking for an exceptional value, add one of our Sterling Fireplace Cabinet systems and you can have your new Bostonian Electric fireplace installed in less than one hour! These mantels allow the fireplace to be installed against any wall in your home. Sterling Fireplace Cabinets make it easy to relocate your fireplace at any time. Take the beauty and heat to other rooms or take it with you when you move. A 15 AMP, 110 VOLT wall outlet is required. A dedicated circuit is preferred but not essential.

METRO MANTEL™

This mantel is constructed of brushed nickel sheet metal with a textured black, powder-coated base. The Metro Mantel is designed to be used with the brushed nickel or black painted Wilmington face. Don't forget to consider adding the optional nickel Arabesque grills to either face for a completely unique look. The mantel is nicely proportioned for average size rooms with an overall height of 36-3/4" and base dimensions of 50-1/8" wide by 18-3/8" deep.

Metro Mantel Dimensions:

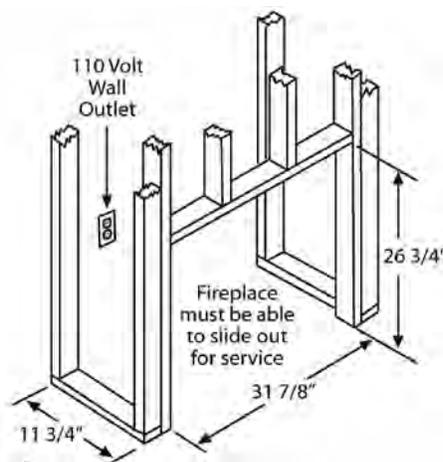

50-1/8" W
36-3/4" H
18-3/8" D

INSTALLATION WITHOUT A FIREPLACE CABINET

If you want a flush-to-the-wall look for your fireplace, you have the option of building in or framing around your electric fireplace. When framing the enclosure you must follow the MINIMUM internal opening dimensions shown below.

The electric fireplace must be able to slide out for service. You must also provide a standard 15 AMP, 110 VOLT wall outlet, preferably on its own breaker, within the enclosure to allow the fireplace to be plugged in. The enclosure must allow the fireplace to be easily removed for service.

CAUTION: Clearance for air circulation beneath the fireplace is critical.

DO NOT INSTALL THE FIREPLACE DIRECTLY ON CARPET OR SIMILAR SURFACES WHICH MAY RESTRICT AIR CIRCULATION.

Flush-to-the-wall installation shown with a pre-built J. C. Huffman Windham Mantel and granite tile surround. Visit www.jchuffman.com.
